ENVIRONMENTAL MANAGEMENT SYSTEM POLICY

Trezzano Rosa, 12th March 2017

Subject: Definition of Environmental Policy

With this document, PSE SPA intends to comply with the requirement specified in paragraph 5.2 – Environmental Policy, of the UNI EN ISO 14001:2015 standard.

PSE Spa is aware that a responsible economic strategy, focused on the environmental issues arising from its activities, is essential to its success. **PSE Spa** also recognizes that the continuous improvement of its environmental performance leads to significant commercial and economic benefits, while at the same time meeting expectations for environmental improvement within the local context.

PSE Spa is therefore committed to pursuing a policy of continuous improvement in its environmental performance, minimizing—where technically feasible and economically sustainable—any negative environmental impact of its activities.

The main environmental impacts **PSE Spa** is required to address are:

- ☐ **Noise emissions into the external environment;**
- ☐ **Atmospheric emissions generated by production facilities;**
- ☐ **Energy consumption;**
- ☐ **Soil discharges;**
- ☐ **Waste production.**

PSE Spa intends to achieve the above objectives through the following actions

- ☐ Ensuring that its activities are carried out in compliance with applicable legal requirements and any subscribed codes of practice;
- ☐ Implementing and maintaining an effective Environmental Management System in accordance with the requirements of the UNI EN ISO 14001:2015 standard;
- ☐ Making every effort, in terms of organization, operations, and technology, to mitigate the environmental impacts generated.
